Catering Suggestions

Ordering the right amount of food:

Multiply the amount of guests by 2.

That number is the amount of servings you will need.

Half Tray = 10-12 servings

Full Tray = 20-24 servings

Do not include salads when estimating amount of food.

When should the food arrive:

We recommend that your order be picked up or delivered as close to the expected serving time as possible. The less time the food sits, the better it will taste.

Water trays and sternos:

Open the sternos and place them on the rack inserts. Fill the deep trays 1/4 - 1/3 of the way with water. The sternos will take about 15 minutes to heat up the water after they are lit.

Notes

If there's anything special you would like and it's not listed, please ask.

A 3% discount will be applied if paying with cash
